

CaliBol®

Application:	Calcium bolus for dairy cows preventing milk fever	
Physical form:	Bolus	
Diameter:	34 mm.	
Length:	165 mm.	
Weight:	Minimum 150 grams	
Composition:	Calcium chloride Magnesium oxide Cellulose fibre (wood fibre) Vegetable fat	
Feed additives:	<u>Technological, 1a:</u> Calcium propionate	
Analytical constituents:	Calcium	27.0 %
	Magnesium	0.50 %
	Calcium per bolus	40 grams
Undesirable substances:	Comply with EU Directive 2002/32/EC and later amendments	
Instructions for use:	<p>1. bolus: Immediately after calving 2. bolus: 10-14 hours after calving For troubled dairy cows: Administer additional one bolus 24 hours before calving and one bolus 24 hours after calving</p> <p>After calcium infusion: 1. bolus: 2 hours after infusion 2. bolus: 12 hours after infusion</p>	
Packaging:	4 boli packed in sealed (ZipLock) bag	
Storage:	Dry in sealed ZipLock bag until use	
Shelf life:	2 years from date of production	
Manufacturer:	R2 Agro A/S Establishment no. α-208-G756042 Covered by European patent No. 2005 0028
