

# CaliBol®

Calcium bolus for preventing milk fever

## Species

Dairy cows

## Consumption

2-4 boluses prior to and after calving

## Packaging

4 boluses of 150 grams  
packed in a zip lock bag  
16, 24 or 48 boluses per box

## WHAT is CaliBol

CaliBol contains a combinations of calcium- and magnesium salts which together effectively prevents milk fever. CaliBol dissolves rapidly in the rumen fluid.

## WHEN

Prior to and after calving to prevent milk fever from arising in dairy cows

## HOW

As a preventive treatment use CaliBol for cows into 3rd and 4th lactation and older cows. Easy quick and clean to administer when given by use of bolus applicator.

## BENEFITS/EFFECT

- Rapidly dissolving calcium
- Easy to administer
- Proven to work
- Noncorrosive to the rumen mucous membranes
- No unpleasant bitter taste
- No risk of miss swallowing
